

tingsha™

Sound Animals

Produced in Kambodscha and the wood is treated with lineseed oil.

With stick.

Sound frogs

These frogs quake if you hold the stick at the thinner end and move the stick with a slight rolling motion from the back to the head. If you cover a part of the mouth with your hand you can modify the sound volum.

Incl. beater

FRO-6 baby, 2.4 x 1.55 x 1.55 inch

FRO-9 mini, 3.5 x 2.5 x 2.5 inch

FRO-11 small, 4.3 x 2.95 x 2.95 inch

FRO-14 medium, 5.5 x 3.3 x 3.3 inch

FRO-22 large, 8.8 x 4.3 x 4.3 inch

FRO-30 jumbo, 12 x 7 x 7 inch

FRO-45 giant, 18 x 10.5 x 10.5 inch

The wizard's owl

If you blow lightly into the back of the head the sound is dark and smokey. If you blow faster the sound is lighter and higher. Owls are active in the night and have good night vision and extraordinary hearing capabilities. A good friend for a wizard. Oiled

EU-1 3.1 x 2.4 x 2 inch

EU-2 3.9 x 2.75 x 2.4 inch

EU-3 5.1 x 3.1 x 2.75 inch

EU-4 6.3 x 3.5 x 3.1 inch

The cricket

is played by rubbing the stick on its stomach. Oiled.

With stick.

GRI-1 2.95 x 1 x 0.7 inch

GRI-2 8 x 2.75 x 2 inch

Elephants

can be blown to activate the membrane inside. Then they roar and trumpet like their relatives in the jungle. Oiled.

ELP-1 5.9 x 5.1 x 2 inch

ELP-2 7.8 x 5.9 x 2.4 inch

ELP-3 9 x 6.7 x 2.75 inch

Dolphins

for snattering through rubbing over the back and blowing at the flipper. Oiled.

With stick.

DEL-1 5.5 inch

DEL-2 8.6 inch

Horses

These horses are made out of PE foam and have a sound membrane in their mouth. When you shake the horses they become rattles or shaker with funny noises. A real sound gag.

A pair.

PF a pair, single: Ø 2.8", 14.4 x 6"

PF-12 a dozen pairs, single: Ø 2.8", 14.4 x 6"
