

Rainmaker

The Quisca Cactus, which provides the magical body for the rainstick, grows in the Atakama desert at the foothills of the Andes.

These cactus live in forests and hold water while they are alive. After they have completed their life cycle, their body dries out and can be used as this magical instrument. The spines are removed, turned around and inserted into the cactus which is then filled with pebbles of different sizes. If you turn the cactus instrument around the pebbles flow over the spines at different speeds, creating the wonderful sound of rain.

Rainmaker thin, 1.6 - 2.4 inch

- RM-0 length 10 inch
- RM-1 length 20 inch
- RM-1B painted, length 20 inch
- RM-2 length 30 inch
- RM-3 length 40 inch

Rainmaker thin, 2.4 - 4.8 inch

- RM-4 length 20 inch
- RM-5 length 30 inch
- RM-6 length 60 inch

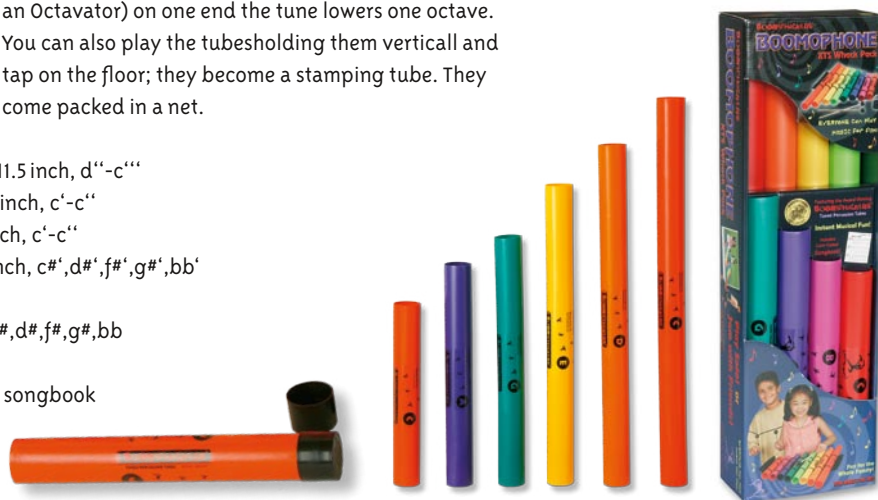

Boomwhacker

Brightly colored percussion tubes for the kids and kids-at-heart. You can whack almost anything and-boom, you are making music. The length of the tube defines the tune and is identified by the color. It is easy in groups to distribute the tubes by length

and color for playing songs. If you put a cap (called an Octavator) on one end the tune lowers one octave. You can also play the tubesholding them vertical and tap on the floor; they become a stomping tube. They come packed in a net.

- BOO-0 small, chromatic extension set C maj, 7 pcs., 8 - 11.5 inch, d[♯]-c[♯]

- BOO-K2 Octavator Caps set of 8 pcs.
- BOO-SET medium, diatonic set C maj, incl. mallets, bag & songbook 8 pcs., 11.5 - 24.8 inch, c[♯]-c[♯]

Stomping Tube Set

Stomping tubes were developed by Ingo Böhme. Boing was awarded the third place prize for this instrument at the 1996 World Congress for Music-therapy in Hamburg. Hold one of the tubes in each hand and stomp them hard on a soft surface. If you play them alone you experience the vibration of the tube in your hand and hear a deep humming sound.

They are great for groups of people. The tubes' humming waves together and you can pass on different rhythm to each other.

The red tubes are sized for children's hands, blue tubes are for grown ups. There are 5 different pitches available.

- STA-SET-1 5 pcs. for children, c[♯], d[♯], e, f, length 38 - 47.6 inch
- STA-SET-2 5 pcs. for grown-ups, G[♯], A, Hb, H, c, length 50 - 63 inch
