

feeltone™

Soundwave, waved surface

First worldwide introduction, 2003.

A real multi-tone instrument. This is a combination of the deep sounding Tongue Drum (grounding, rhythm, integration, structure) with 4 tones (A, B, d, e).

On the other side a Monochord (time and spaceless, lightness, floating) with 18 blank and 18 spinn and 4 extra thick, spinn, golden strings. All tuned to the same tune with one octave in between.

Heaven and Earth.

Most of my patients are astonished by the feeling of "completely being wrapped in sound".

And to their greatest surprise, the soundwave is very easy to play. One of my recent customers was a professionally trained musician. She was deeply impressed. I had to explain to her afterwards how easy it was to play the instrument. She obviously didn't have a clue while lying down on the soundwave. Lots of people tell me that they immediately are ,somewhere': up in the mountains, in a landscape, ...

B

KLW waved surface, 40 strings, sound range B-d / b-d', Tongue Drum A, B, d, e, 74.8 x 26 x 24.4 inch

feellone™

Soundwave, straight surface

Sound wave with flat surface. The flat surface has an opening for the face which allows people to also lie down flat on their belly. Good for sound and other massages. The top surface is 76 inch long and 28 inch wide.

The sound wave is such a complete and powerful instrument. The four notes of the tongue drum each address an other part of the body. The big tongue drum therefore is a perfect instrument to start a session with. It allows you to ,feel' and tune into the person. By playing the tongue drum you can invite your customer to slow down his breathing and heart rhythm. A steady drum rhythm can bring you and / or your customer in a trance. The monochord is very different from the drum. It creates smooth, rich sound waves that take you on a journey within. You may experience a deep sense of relaxation, see shapes or colors, hear choirs, flutes, horns or other kinds of instruments or feel deeply rooted emotions. I often use the soundwave for people with emotional stress. It helps opening up doors, gates previously kept locked.
